## About the company

Sadbhav Infrastructure Projects (SIPL) is one of the leading road BOT companies in India, which specialises in development, operation and maintenance of highways, roads and related projects. SIPL, a subsidiary of Sadbhav Engineering (SEL), was incorporated in 2007 as a developer and operator for highways, road and related projects on a BOT basis. All of its projects are implemented and held through special purpose vehicles (SPV), including joint venture entities.

SIPL is involved in the development, operation & maintenance of national, state highways and roads across seven states in India including Maharashtra, Gujarat, Rajasthan, Karnataka, Haryana, Madhya Pradesh, Telangana and border check posts in Maharashtra. Furthermore, on an annual basis, SIPL is prequalified to bid either directly or through joint ventures for DBFOT projects worth up to | 2650 crore by NHAI up to December 31, 2015.

SIPL has a project portfolio consisting of 10 BOT projects of which six road projects are fully operational, one is a partially operational border check post and the remaining three are in various stages of development. Nine of the 10 BOT projects are toll projects (including user fee for the border check posts in Maharashtra) while the remaining is an annuity project. Furthermore, SIPL's operational projects cover approximately 1,531.16 lane km and projects under development cover ~1,061.48 lane km. In addition, as of May 31, 2015, SIPL's subsidiary MBCPNL completed 13 check posts and is developing nine more check posts for the MBCPNL project.

The company generate revenues primarily from toll collection, user fee and annuity receipts. The Company also provides operation and maintenance and advisory and project management services to projects. For the financial year ended March 31, 2015, consolidated revenue from operations and net loss amounted to Rs. 500.3 crore and Rs. 301.6 crore, respectively.

The company is solely engaged in BOT projects and the industry is highly capital intensive. The business has long gestation period thus require huge financing requirement. For the last three years, it has posted net loss due to high financing cost. The company has been earning operating cash flows on constant annuity basis and once the debt get de leveraged, the real earnings growth would start reflecting in the bottom line. Hence, the IPO is highly priced and one can purchase the scrip from secondary market at much lower price, when the fair value of scrip will start reflecting. We advice our investors to **AVOID** this Public Issue.
